

AgModels

# AgModels, LLC<sup>1</sup>

AgModels is a privately-owned company dedicated to the exploration, evaluation and implementation of advanced information technologies focused on improving agricultural productivity worldwide.

## Mission

Our mission is to provide agricultural producers with tools and technologies to improve their enterprises' operational efficiencies, data collection, regulatory reporting efficiency, and profit margins through research, development, marketing and support of digitally based herd management, nutrient and economic applications, and consulting services.

## Goals

1. Establish AgModels as an industry leader in agricultural information management systems.
2. Provide farm management teams with practical information technology (IT) based tools to improve efficiency and productivity
3. Establish AgModels' business operations on a quality business management systems framework
4. Focus on our customer's requirements
5. Establish a secure, sustainable, easy-to-use, and responsive operating environment for AgModels' products
6. Recognize and respect the legal and intellectual property of stakeholders.
7. Provide relevant data to the AgModels Foundation, a 501 (c) (5) not-for-profit organization for research purposes for the betterment of the industry

## AgModels Leadership Team
